Following a pandemic-driven 12.1% drop in employment in the Dallas-Fort Worth metro area in the first half of 2020, the local job market rebounded significantly over the next 12 months. From June 2020 to June 2021, employers in the Metroplex created or restored 329,500 jobs, a 9.5% annual increase.

Since mid-2020, Texas has consistently had some of the least restrictive COVID-related mandates in the country, and this atmosphere has enabled rapid job recovery, particularly in service-related industries. In the leisure and hospitality sector, 103,900 workers were hired or reinstated in the last 12 months, equating to 40.1% year-over-year growth. In the higher-wage professional and business services segment, 58,000 newly

created positions were filled, a 9.7% increase. The other two white-collar sectors had expanding payrolls, as well. In the financial activities sector, staffing levels grew 4.1% with 13,200 newly filled jobs, while 4,300 additional workers were hired in the information industry.

Continued economic recovery will be buttressed by corporate relocations and expansions. Two of these expansions are a 1.5 million-square-foot Home Depot Inc. distribution center in Dallas that will employ 1,500 workers by the end of this year and Charles Schwab Corporation's recent announcement to fill 1,000 well-compensated positions in the metro area.

As of the second quarter of 2021, 75 apartment communities representing a total of 20,782 units were in lease-up in the metro area. Also in the second quarter, builders completed more than two dozen apartment developments in, contributing to a total of 7,898 units that were brought into service. This new stock was a 30.6% increase over robust deliveries in the second quarter of 2020.

Approximately 17% of the inventory delivered in the second quarter of this year emerged in the neighboring Allen/McKinney and Frisco submarkets, where a wave of corporate relocations and expansions have occurred in the last several years and are still underway. These two submarkets had the first- and third-

highest net apartment absorption among the 48 submarkets in the metro area in the second quarter.

Over the next four quarters, nearly 4,300 new apartments are expected to come online among the Allen/McKinney and Frisco submarkets—a sizable portion of 23,355 new apartments anticipated in the metro area during that time. As of mid-2021, multifamily developers had 307 developments across the metro area in various stages of the planning process. Of those, 65 developments are expected to break ground by mid-2022. When completed, these multifamily communities will add more than 18,600 units to metro inventory.

The Texas economy opened fully in mid-March 2021, increasing the ability of residents to make changes to living arrangements they may have delayed during the height of the pandemic. This development set the stage for a surge of apartment demand in the Dallas-Fort Worth metro area in the second quarter of this year. The heightened demand propelled apartment occupancy to 94.9% in the second quarter, a 90-basis-point increase from the first quarter.

The expanding return to normalcy in the urban areas in the metro center fueled quarter-over-quarter increases in occupancy of 180 basis points in the Intown Dallas submarket and 110 basis points in the Intown Fort Worth/University submarket. Apartment occupancy

rose significantly even where a flurry of new apartments emerged—submarkets like Frisco and Allen/McKinney—where the occupancy rate increased 200 and 130 basis points, respectively, from the first quarter to the second quarter.

Surging apartment demand across the metro enabled operators to boost rents. Average monthly effective rent in the metro area advanced 4.2% quarter over quarter to \$1,243 in the second quarter, part of a 5.1% annual increase. Sustained leasing activity in the urban cores—the Intown Dallas and Intown Fort Worth/University submarkets—generated respective quarter-over-quarter rent gains of 4.7% and 3.3%.

2022 RESIDENTS*

8,056,800

↑ 1.5% YOY

*PROJECTED

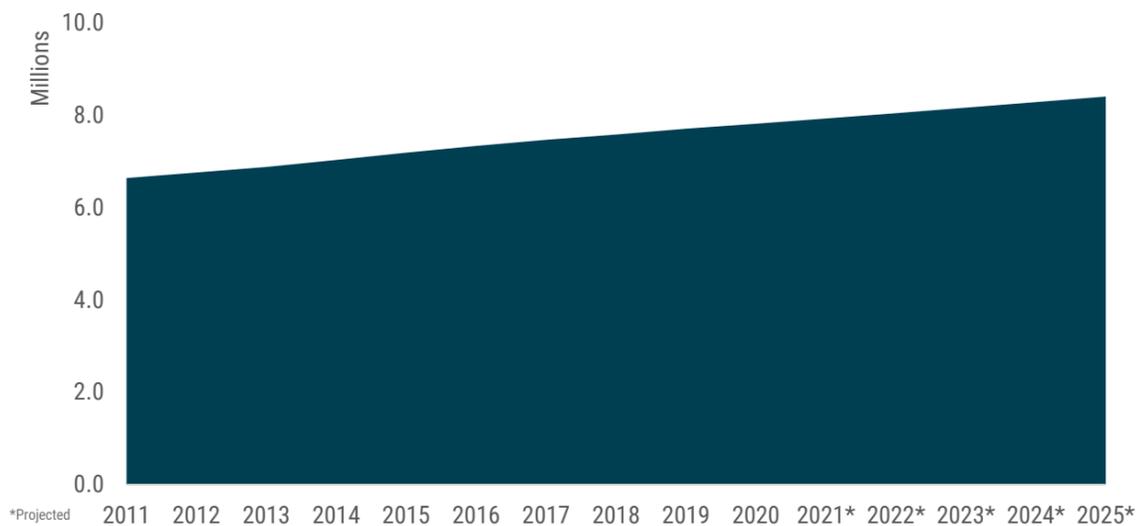

The population of the 11-county Dallas-Fort Worth metro area was just over 7.8 million persons in 2020, a 1.4% gain over 2019. Some shifting of households within the metro did occur during the pandemic. Nearly 93,800 residents left urban centers in the metro area in 2020 for various reasons, including for more affordable rents, for career changes requiring relocation, or to purchase a home in one of the many area suburbs.

Fewer residents departed urban centers in the Metroplex compared to some other similar-sized metros, like Boston, Los Angeles, San Francisco, and Washington, D.C., where urban outmigration ranged from 140,000 to over 420,000 people. And of the 93,800 people who migrated out of urban

cores in the Metroplex, 76% of them stayed in the metro area. Fewer than 12% of those who left urban areas in the metro area moved on to other large metro areas in the country.

The local median price for existing single-family homes is about 19% lower than the national average. This factor plus the metro's business-friendly climate will continue to attract new residents: Moody's projects a net inflow of 337,100 people over the next five years. This influx will be a key contributor to the formation of 290,800 households that Moody's forecasts during the same period.
